

Promisec Integrity

Ensuring endpoint integrity through cloud-based cyber detection

Promisec Integrity is the first solution of its kind, providing small-to-medium enterprises with an affordable, customizable solution to ensure compliance and integrity across the entire endpoint environment. The cloud solution offers customers the same nimble, agentless functionality as our on-premise offering, but through a browser interface to enable antivirus validation, unauthorized software discovery, patch management validation, and advanced threat detection.

Affordable Cyber Protection through Promisec's Secure, Multitenant Cloud

Designed to meet the unique needs of small-to-medium enterprise environments, Promisec Integrity leverages the flexibility and scalability of the cloud to offer advanced cyber protection that is affordable and easy to deploy and use. With Promisec's cloud-based solution, enterprise clients are able to:

- Detect malware, disabled clients and outdated patches across all endpoints
- Determine if, and where, any unauthorized applications are running on your systems
- Compare current status to security and network standards to ensure alignment
- Create and print customized inspection reports, as well as view previous inspection results
- Close the risk window with access to real-time, actionable intelligence

A Solution Built for Your Business

Promisec Integrity includes two basic services, which can be combined to meet the changing needs of your business:

Integrity Threat Detect

Available through a freemium pricing model, Integrity Threat Detect identifies and targets specific threats, scanning your entire endpoint environment to determine if malware has added registry keys, services or processes.

Integrity Quick Check

Available through a flexible subscription pricing model, Integrity Quick Check offers real-time visibility of endpoint environments with antivirus validation, patch management validation and unauthorized application checks.

Visibility and Control

Promisec Integrity provides real-time visibility and control of your endpoint environment with antivirus validation, patch management validation, unauthorized application checks, and end-to-end scans for the latest cyber threats and malware. Inspections can be customized to meet the specific needs of your business.

Actionable Intelligence

With a few simple clicks and within a matter of moments, the cloud-based solution is able to determine what endpoints are non-compliant and for what reasons, according to the customized service selection. The solution is continually updated to address the latest malware threats as they emerge.

The Result: 100% Endpoint Integrity with Unprecedented Time to Value

Promisec Integrity represents the industry's first Software-as-a-Service (SaaS) offering with out-of-the-box functionalities to detect even the most sophisticated malware and cyber threats and provide actionable insight for remediating issues and limiting business impact. Whether your environment has a few hundred to a few thousand endpoints, the solution ensures that all IT assets are running approved software, all antivirus agents are up to date and running, and all software can be properly patched. The business benefits speak for themselves:

- **Instant threat intelligence**, including detection of the most advanced malware and cyber threats, plus actionable insight to safeguard business reputation and value
- **Customizable service structure and seamless SaaS billing options**, enabling you to implement and scale your solution for maximum return on investment
- **No storage restrictions or inspection limits**, enabling you to customize inspection types and frequencies to meet the changing needs of your business
- **Microscopic footprint and superior data security** through Microsoft® Azure, which ensures that all data is encrypted in flight and at rest in a multitenant data store

About Promisec

Promisec is a pioneer in endpoint visibility and remediation, empowering organizations to avoid threats and disarm attacks that can lead to unwanted headlines and penalties. Promisec's technology assures users that their endpoints are secure, audits are clean, regulations are met and vulnerabilities are addressed proactively to ensure the integrity of enterprise IT. More than 400 globally recognized companies, including Amdocs, Fossil, Teva and Wellpoint, trust in Promisec to stay secure and operationally efficient.
